

Representative GO2SUM outputs flagged for manual review

flag category	protein / output	original go2sum wording	words
obsolete / placeholder (n=258) literal obsolete or malformed placeholder wording	B9J08_000672 function	This protein is an obisoluteute protein.	6
obsolete / placeholder (n=258) literal obsolete or malformed placeholder wording	B9J08_002843 function	OBSOLETE is required for cell division.	6
photosynthesis / chloroplast (n=23) plant or plastid language in this fungal protein set	B9J08_000070 pathway	Photosynthesis; C4 acid pathway.	4
photosynthesis / chloroplast (n=23) plant or plastid language in this fungal protein set	B9J08_004645 function	Required for efficient group II intron splicing. Binds specific group II introns in chloroplasts and facilitates their splicing. Acts on subgroup IIB introns. The substrates of the ...	52
metazoan / clinical (n=11) human, animal or clinical wording needing taxonomic review	B9J08_005063 subunit	Interacts with human KDR.	4
metazoan / clinical (n=11) human, animal or clinical wording needing taxonomic review	B9J08_000006 function	May play a protective role in mucosal tissues by preventing exaggerated allergic responses.	13
bacterial / viral (n=24) bacterial, viral or host-pathogen wording needing taxonomic review	B9J08_001949 function	Has antibacterial activity against the Gram-positive bacterium S.aureus and the Gram-negative bacteria E.coli ML35p and P.aeruginosa. Lacks antifungal activity against C.albicans.	21
bacterial / viral (n=24) bacterial, viral or host-pathogen wording needing taxonomic review	B9J08_002031 function	Major envelope protein that plays a role in the biogenesis of the viral double membrane and in egress of virus particles from the host cell.	25
extreme sequence-length wording (n=44) unusually long output by the per-output-type iqr rule	B9J08_001011 function	This protein is an atypical, non-specific DNA-binding protein that functions in cell cycle urmari urmari urmari urmari urmari urmari urmari urmari urmari ...	1011
extreme sequence-length wording (n=44) unusually long output by the per-output-type iqr rule	B9J08_003532 function	The BBSome complex is thought to function as a coat complex required for sorting of specific membrane proteins to the primary cilia. The BBSome complex is required for ciliogenesis but is ...	141
